

NEZO Presentation
“A Transnational NewSpace Business Incubator”
Fast Forward Study Group
1/8/10

Introduction

About NEZO

- Nonprofit, Independent, Global
- Joint Venture, for profit spin-off
- Primary Stakeholders (States, Operators, Tenants)

Strategy

- Global NewSpace Network (GNN)
- Private Commerce Network (PCN)
- Transnational business incubator
- Global self-regulation, domestic equivalence in each State

Historical precedence

- Lex Mercatoria
- Private global governance (IASB, ICANN, many others)
- Economic Zones (extraterritorial R&D, Manufacturing, Trade, Transportation)
- Public-Private Partnerships (2 levels)

Future of NewSpace international commerce without NEZO?

- Supranational government controlled market
- Global maze of reactive treaties
- International deadlock

Example: manufacturing and transportation within PCN

A licensed Vehicle manufacturing Tenant in a certified US zone purchases Rocket Engines from a licensed manufacturing Tenant in a certified Mexico zone, to build vehicles that are sold to licensed passenger carrier Tenants in a certified German zone and a certified Australian zone that conduct Z2Z flights to 5 other GNN member State's certified zones.

PCN Results:

- Free market transfers for all cross-border transits of assets, and the Z2Z flights
- No direct Defense Department involvement in the commerce transactions
- No direct US, Mexican, German, or Australian customs involvement in transactions
- No restrictions on technology transfer, IP retained within the PCN
- No direct CAA control of transactions or flights by member States (coordinated)

Q & A session
